SOC-as-a-Service

DATASHEET

METCLOUD & CYGILANT PARTNERSHIP

METCloud and Cygilant have joined forces to help UK businesses gain access to some of the best-of-breed technology and cybersecurity-as-a-service. This new partnership will improve overall security capabilities to METCloud clients with the integration of other security technologies such as LogPoint, SentinelOne and Tenable.io.

This allows swift threat detection, response and remediation while gaining better understanding of a company's threat risk and priorities when fixing vulnerabilities. The robust suite of services will be provided through a UK-based Security Operations Centre (SOC) that provides users dedicated 24x7 support. This is invaluable in the current climate where cybercrimes are more virulent than ever before.

SOC-as-a-Service

Cybersecurity is hard work. Resource constraints - not enough time or limited resources and ever-increasing threats coupled with compliance requirements is leaving your business at a disadvantage and causing team burnout. Our SOC-as-a-Service exists to help you.

Extend your team with SOC-as-a-Service

True 24x7 SOC

We operate global Security Operation Centres (SOCs) with four tiers of humans from level 1s to 4s working around the clock.

Cybersecurity Expertise

Experienced staff deliver industry leading security using bleeding edge techniques and tools.

Best-in-Class Service

Relieving you of the stress and burnout associated with cybersecurity is our main goal.

We pride ourselves on delivering best-in-class service.

CONTINUOUS EYES ON YOUR SYSTEMS

- 24x7 global coverage
- Experts in cybersecurity
- Monitor, triage, investigate, and provide tailored remediation advice

SIEM & LOG MANAGEMENT / MDR

- Choose best-of-breed threat detection technologies
- Event correlation, network intrusion detection (IDS), and threat intelligence
- Log management, with at least 12 months log retention
- 24x7x365 Incident response

BEST-IN-CLASS SERVICE

- Your cybersecurity partner, expect only the best service in the market
- Security incident severity response from P1-P4

ENDPOINT PROTECTION POWERED BY SENTINELONE

- Complete visibility into the endpoint environment with full-context
- Single purpose-built agent powered by machine learning and automation

ALERT POLICIES & INCIDENT RESPONSE

- SOC will develop rules to trigger alerts for suspicious activity or security violations
- Continuous fine-tuning and policy updates on an ongoing basis
- Integrated ticketing system guides you through the incident response process from detection to resolution

COMPLIANCE REPORTING

- Audit logs
- Cloud access and activity logs
- Compliance reports to meet your industry regulations FFIEC, PCI DSS, HIPAA
